Samuel Gichu

SENIOR SOFTWARE ENGINEER - MOBILE-FIRST | FULL-STACK

+254 728 370 802 | kibochas@gmail.com | linkedin.com/in/samuel-gichu-a29695b9 | a7studio.dev |

Nairobi, Kenya (Remote-first)

PROFESSIONAL SUMMARY

Remote-first senior software engineer with 6+ years shipping production mobile and web products for distributed teams across Kenya, Europe and North America. Mobile-first (Flutter/React Native) with full-stack range (React/TypeScript, Node.js/NestJS, PostgreSQL) and fintech/payments depth, comfortable with software architecture and system design. Comfortable working async across time zones, owning features end to end, and shipping with automated testing and CI/CD.

CORE COMPETENCIES

Remote Collaboration | Flutter & React Native | React & TypeScript | Node.js & NestJS | Payments & Ledgers | CI/CD & Testing | Async Communication | End-to-End Ownership

WORK EXPERIENCE

Boya

May 2026 - Oct 2026

Full Stack Engineer - Fintech & Payments

Nairobi, Kenya

- Built and integrated payment workflows across mobile, backend APIs and system integrations, including Stripe, webhooks and transaction lifecycle handling.
- Strengthened data integrity across wallet and ledger flows: double-entry correctness, negative balances, and failure/retry paths.
- Built payments and operations dashboards in React and Vue.js on NestJS APIs.

BeatBnk

Jan 2025 - May 2026

Mobile Team Lead - Senior Flutter Engineer

Nairobi, Kenya

- Led a distributed mobile team as a hands-on engineer: architecture, code review, mentoring, and shipping the hardest parts.
- Introduced testing and CI/CD that improved team velocity 35% and cut production bugs 60%.
- Used AI-assisted workflows (MCP, coding agents) to cut development time ~40%.

Alvin Technologies

Mar 2022 - Dec 2024

Senior Frontend & Mobile Engineer

Remote

- Delivered embedded-finance apps for enterprise clients across mobile and web, asynchronously with a remote team.
- Reached ~85% automated test coverage and 50% faster deployments through CI/CD automation.
- Built React and Vue.js dashboards on NestJS APIs and custom Flutter packages integrating native iOS and Android APIs.

KAKITOO

Jan 2023 - Jan 2024

Lead Mobile Engineer

Kenya

- Led a privacy-first M-PESA tipping platform end to end (Flutter iOS/Android + React web), including STK Push and USSD flows.
- Designed mobile-first experiences for low-connectivity users and owned app-store releases.

SYNTAX Ltd

Apr 2021 - Mar 2022

Mobile Engineer (Flutter)

Remote

- Shipped production Flutter apps for US and UK clients, building reusable component libraries and fixing production issues.

mb96 Ltd

Sep 2019 - Apr 2021

Software Engineer - Mobile & Web (Flutter / React)

Kenya

- Shipped cross-platform mobile and web products for clients in Kenya, Canada and the US.

Valuencer

Nov 2023 - Jun 2024

Senior Frontend Engineer

- Built a React/TypeScript Web3 investment platform frontend with Sui SDK integration and PWA support.

PROJECTS

T-Kash (Telkom Kenya) - via mb96

Mobile payments app with flows for payments, balances and telecom services.

Flutter, Mobile Payments, Telecom APIs

Chupachap - Nairobi

Live e-commerce delivery platform with a 500+ item catalog and mobile checkout.

Flutter, React Native, WooCommerce

Giraffe Spotter - SYNTAX Ltd

Citizen-science app: photo upload, AI pattern matching, location capture and donations.

Flutter, AI Image Matching, Firebase

EDUCATION

BSc Computer Science Meru University of Science and Technology 2018

SKILLS

Mobile: Flutter, Dart, Kotlin/Android, iOS, React Native, Native API Integration, Offline-First Sync

Frontend: React, Vue.js, Next.js, TypeScript, TanStack Query, PWA **Backend:** Node.js, NestJS, REST APIs, PostgreSQL, Firebase

Payments: Stripe Connect, M-PESA STK/USSD, KYC/KYB, Ledgers, Idempotency

Practices: Remote/Async Collaboration, CI/CD, Automated Testing, Code Review, Mentoring

Engineering: System Design, Software Architecture, API Development, Web Development, End-to-End Ownership
